# EXPERIMENT 7

## SELECT with WHERE and Pattern Matching

**Aim:** To filter records using WHERE and perform pattern matching using LIKE.

**Software Required:** MySQL 8.0 Command Line Client

### SQL Program

```
USE SQL_Lab;

CREATE TABLE Students (
    student_id INT PRIMARY KEY,
    student_name VARCHAR(50),
    department VARCHAR(20),
    marks INT
);

INSERT INTO Students VALUES
(1, 'Harika', 'CSE', 85),
(2, 'Ravi', 'ECE', 72),
(3, 'Priya', 'CSE', 90),
(4, 'Kiran', 'EEE', 65),
(5, 'Hari', 'ECE', 78);

SELECT * FROM Students;

SELECT * FROM Students
WHERE marks > 75;

SELECT * FROM Students
WHERE student_name LIKE 'H%';

SELECT * FROM Students
WHERE student_name LIKE '%i';

SELECT * FROM Students
WHERE student_name LIKE '%ar%';
```

## Observation

Execute the SQL statements in MySQL 8.0 Command Line Client. Verify that each statement runs successfully and that the displayed rows match the inserted sample data and query conditions.

**Note:** In LIKE patterns, % matches zero or more characters and _ matches exactly one character.

## Result

Thus, Experiment 7 (SELECT with WHERE and Pattern Matching) was performed using MySQL 8.0.
